Jennifer Sutherland

PROFILE

I'm a junior engineer seeking a team that wants to develop in the Cloud. In my previous experience, I have worked well in teams and independently. Currently working with an Agile development team with extensive communication across infrastructure, architecture, QA and engineers. As a veterinary technician, I honed my problem solving skills in time-critical, high-stress situations and as a special effects artist, I have mastered customer relations and team building. I bring impeccable work ethic, strong collaboration, research, and customer needs assessment skills.

EXPERIENCE

DEVOPS ENGINEER, COMCAST — 2016 AUGUST -CURRENT

Developing application code for ingestion and transcoding of content for the Video On Demand platform. Responsible for implementing new workflows for syndication parters and maintaining and updating legacy code and ensuring code test coverage.

CUSTOMER SUCCESS CONSULTANT, NET-RESULTS — 2016 FEBRUARY - MAY

Assisting clients with using platform, creating responsive custom landing pages and email templates. Writing programs to generate custom reports for clients on request.

SPECIAL EFFECTS ARTIST, MONSTER MAKEUP FX — 2012-2016

Special effects makeup application and fabrication. Experience on film crews, sponsoring special events, as well as teaching classes.

CERTIFIED VETERINARY TECHNICIAN, DEER CREEK ANIMAL HOSPITAL — 2006-2014

Eight years' experience as a vet tech. Handled all aspects of patient care including surgery, dentistry, ER triage, radiology, laboratory duties, as well as client education and training interns.
